***Election/Restrictions***

Claims 7-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected apparatus, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on September 30, 2005.

Applicant traverses the restriction because of the belief that a serious burden does not seem to be present in that all claims will be searched. However, the examination of the article claims does not require a search of the apparatus.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2-6 and 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 5,541,910.

The reference discloses a substrate for a recording medium comprising a recess on one side and a circular projection on the other. The diameter of the central hole and the height of the projection are disclosed. See Figure 1.

***Allowable Subject Matter***

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
